

This diagram shows a cross-sectional view of a container assembly. The assembly includes a lid (1) with a top surface (2) and a bottom surface (3). The lid is secured by a clamping mechanism (4) and a gasket (5). The container body (6) has a top flange (7) and a bottom flange (8). The interior of the container is divided into two main sections: a front section (9) and a rear section (10). The front section (9) contains a series of horizontal slots (11) and a central vertical partition (12). The rear section (10) contains a series of horizontal slots (13) and a central vertical partition (14). The bottom of the container is formed by a base (15) which includes a series of circular openings (16) and a central vertical partition (17). The base is supported by a series of vertical ribs (18). The entire assembly is shown in a cross-sectional view, with a side view (19) indicated by a dashed line and an arrow.
